OVERVIEW

Leveraged independent learning to build a strong foundation in web development with 3+ years of experience building dynamic web applications. Adept in Vanila JavaScript, Raw PHP, ReactJS, Laravel, and modern technologies. Proven track record of exceeding client expectations through high-quality results and clear communication. Passionate about leveraging skills in a challenging and collaborative environment

SKILLS

- **Languages:** Javascript, PHP, Typescript, SQL.
- **Forntend:** Javascript, Typescript, ReactJS, TailwindCSS, Jquery.
- **Backend:** Laravel, Livewire, Nodejs, ExpressJS, EJS, API.
- **Tools:** Git, Gitub, AI, Vite, Webpack, VS Code, PHPStrom.
- **Soft Skills:** Rapport Building, Strong Stakeholder management,Team work & Management, Excellent communication

EXPERIENCE

FULL-STACK WEB DEVELOPMENT | Fiverr.com | Appsaeed   Feb 2021 - Present

- Gained advanced proficiency in Laravel, API development, raw JavaScript, and PHP through real-life working experiences. Successfully applied these skills across numerous projects, contributing to high client satisfaction rates and earning 5-star ratings for 55 projects out of over 57 completed.
- Engaged in a diverse range of projects, involving both updates to existing systems and the development of new solutions from scratch. Below, I've highlighted two projects that were built entirely from the ground up
- Implemented AI Content Creation with OpenAI, DALL-E etc, and image streamlined processes. Efficiently built Laravel CRM Dashboard, SaaS, improving client communication. Acquired versatile skills for interpreting documentation.

PROJECTS

Laravel SaaS Application | Live   September 2023 - January 2024

- Built a Laravel SaaS app with user/admin dashboards and a custom real-time chat that facilitates seamless communication.
- I successfully tackled chat integration challenges through rigorous testing and debugging, and implemented automated cron jobs to ensure smooth operation.
- The application also empowers super admins with control over environment and settings.

NPM Packages | Github   January 2024 - April 2024

- Published npm packages: (Javascript utility package) for JS utilities functions and methods to integrate and enhance developer experiences in the development of an application faster.
- Open-Source Contributor: exploring and contributing to open source javascript, react, PHP, and laravel projects.
- Vite.js Plugins: Developed (vite-svg, vite-sitemap) for SVG integration & sitemap generation. (Focuses on Vite and key functionalities)

NodeJS courses streaming | Github   March 2014 - April 2014

- Backend Node.js interactively! This platform offers YouTube/Udemy-like features for students & teachers: Watch lectures, build content & playlists, discuss concepts.
- track progress, leverage comments & likes. Replay abilities empower teachers. Go beyond videos: Implement full-stack with Custom Model Queries (toughest challenge, but aced it with Laravel knowledge!)

Auxonic beta tools | Github | Live   June 2023 - August 2023

- This is a web-based developer toolkit built with React.js and TypeScript for lightning-fast performance.
- It offers essential tools like image-to-text conversion and IP lookup, all in one convenient platform. Firebase Authentication keeps things secure and lets you personalize your experience
